

CURVED KITCHEN

DESCRIPTION

A tangible kitchen design solution for outdoor areas. A project born out of the use of technological materials and details that enable excellent resistance to weather condition.

Unique shapes, precious details, unusual finishes, cutting-edge technology, these are the ingredients for a kitchen designed to pave the way for new trends in outdoor luxury furnish.

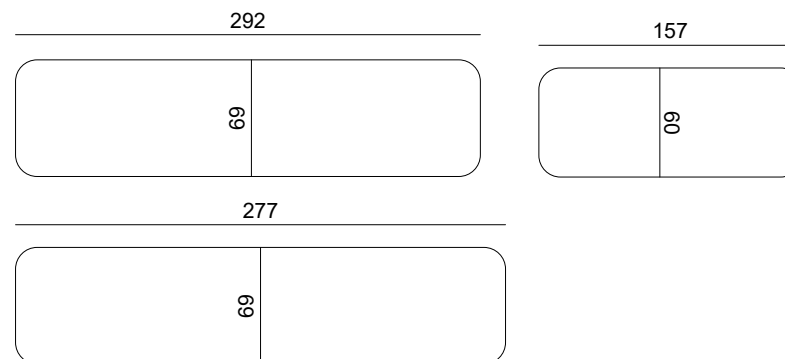

The client can choose to combine together different modules and accessories for cooking and for the refrigerator, cabinet, inner drawers and shelves: everything, with the precise purpose of making the kitchen as functional and versatile as possible, depending on the requested use.

MEASUREMENTS

MATERIALS

Free standing kitchen. The kitchen has an aluminum base covered with hand-woven synthetic wicker that follows the curved shape of the structure, with visible legs in a metallic finish. The structure is made of weather-resistant steel to withstand all outdoor conditions.

The modules of the structure are made of iron painted with an ultra durable powder coating, which meets the demanding weathering requirements of the leading industry specifications Qualicoat Class 2, GSB master, and AAMA 26045, as well as BS EN 12206. The doors are panelled with porcelain tiles featuring an exclusive metallic finish that confers elegance and guarantees durability for outdoor cooking.

The appliances are equipped with a protective covering when not in use.

The outdoor kitchen top is made in porcelain stoneware surface 12 mm thickness suitable for contact with foodstuffs, heat and frost resistant, resistant to UV light, no alteration to colours, stain resistant.

OPTIONAL

Protective cover.
